HFV6

AUTOMOTIVE RELAY

Features

- 30A switching capability
- Ambient temp. range up to 125°C
- 1 Form A & 1 Form C contact arrangement
- Plastic sealed and dust protected types available
- RoHS & ELV compliant

Typical Applications

Lighting control, Headlight control, Electromagnet control
Air-conditioning, Heaters (seat, front/rear windows),
Fan motors control, Fuel pump control, Wiper motors control

CHARACTERISTICS

Contact arrangement	1A, 1C
Voltage drop (initial)	NO:Typ.15mV,250mV max.(at 10A)
	NC:Typ.25mV,250mV max.(at 10A)
Max. continuous current [1] [10]	30A (Resistive)
Max. switching current [10]	30A (Resistive)
Max. switching voltage [2]	27VDC (Resistive)
Min. contact load	1A 6VDC
Electrical endurance	See "CONTACT DATA"
Mechanical endurance	1×10^7 OPS (300OPS/min)
Initial insulation resistance	100MΩ (at 500VDC)
Dielectric strength [3]	500VAC
Operate time [10]	Typ.: 5ms (at nomi. vol.)
	Max.: 10ms (at nomi. vol.)
Release time [4] [10]	Typ.: 2ms
	Max.: 10ms
Ambient temperature	-40°C to 125°C
Vibration resistance [5] [10]	10Hz to 60Hz 0.35mm DA
	60Hz to 500Hz 49m/s²
Shock resistance [5] [10]	196m/s²

Flammability [6]	UL94-HB or better (meets FMVSS 302)
Termination	QC, PCB [7]
Construction	Plastic sealed, Dust protected
Unit weight	Approx. 22g
Mechanical data [8]	cover retention (pull & push): 200N min.
	terminal retention (pull & push): 100N min.
	terminal resistance to bending
	(front & side): 10N min. [9]

1) For NO contacts, measured when applying 100% rated voltage on coil.
2) See "Load limit curve" for details.
3) 1min, leakage current less than 1mA.
4) The value is measured when voltage drops suddenly from nominal voltage to 0 VDC and coil is not paralleled with suppression circuit.
5) When energized, opening time of NO contacts shall not exceed 100μs, when non-energized, opening time of NC contacts shall not exceed 100μs, meantime, NO contacts shall not be closed.
6) FMVSS: Federal Motor Vehicle Safety Standard.
7) Since it is an environmental friendly product, please select lead-free solder when welding. The recommended soldering temperature and time is (250±3)°C, (5±0.3)s.
8) Only valid for QC version.
9) Test point is at 2mm away from teminal end, and after removing testing force, the terminal transfiguration shall not exceed 0.5mm.
10) Only for the 12VDC coil voltage type.

CONTACT DATA [5]

HONGFA RELAY
ISO9001, ISO/TS16949 , ISO14001, OHSAS18001, IECQ QC 080000 CERTIFIED   2012 Rev. 1.01

1) Corresponds to the peak inrush current on initial actuation.
2) Corresponds to the peak inrush current on initial actuation (cold filament).
3) The load wiring diagrams are listed below:

diagram 1   diagram 2   diagram 3   diagram 4   diagram 5
4) The load in the table excludes flasher. When applied in flasher, please connect by the polarity request according diagram 3, a special silver alloy
contact material should be used and the customer special code should be (170) as a suffix.
5) Loads mentioned in this chart is for relays with no parallel diode or Zener Diode. For those with parallel diode, Zener Diode or other components,
please contact Hongfa for more technical supports.
Please also contact Hongfa if the actual application load is diffrent from what mentioned above.

COIL DATA

	24	14.4	2.4	441	1800	354.2	1.6	33	25

1) Max. allowable overdrive voltage is stated with no load applied and minimum coil resistance.

ORDERING INFORMATION

HFV6 / 012 Z S L -T R (XXX)

Type	**HFV6**: QC **HFV6-K**: Grip & QC **HFV6-P**: PCB
Coil voltage	**012**: 12VDC **024**: 24VDC
Contact arrangement	**H**: 1 Form A **Z**: 1 Form C
Construction [1]	**S**: Plastic sealed [2] **Nil**: Dust protected
Coil power	**L**: Sensitive **Nil**: Standard
Contact material	**T**: AgSnO$_2$
Parallel coil [3] **components**	**R**: Parallel transient supression resistors **D**: Parallel transient supression diode,with anode connected to terminal#2 **D1**: Parallel transient supression diode,with anode connected to terminal#1 **Nil**: Without parallel components
Customer special code	e.g. (170) stands for flasher load

1) Dust protected version is recommended.
2) If water cleaning is required after the relay is assembled on PCB, please contact us for suggestion about suitable parts.
3) If parallel diode, Zener Diode or other components are required, please contact Hongfa for more technical supports.

CHARACTERISTIC CURVES

1. Coil operating voltage range

Percentage of nominal coil voltage vs Ambient temperature (°C)

Umax.
Upick-up (after pre-energization under Unomi.)
Upick-up (initial)

1) The operating voltage is connected with coil pre-energized time and voltage. After pre-energized, the operating voltage will increase.
2) The maximum allowable coil temperature is 180°C. For the coil temperature rise which is measured by resistance is average value, we recommend the coil temperature should be below 170°C under the different application ambient, different coil voltage and different load etc.
3) If the actual operating coil voltage is out of the specified range, please contact Hongfa for further details.

2. Load limit curve

Switching voltage (VDC) vs Switching current (A)

100W
50W
250W
20W
10W
1) The load and electrical endurance tests are made according to "CONTACT DATA" parameters' table. If actual load voltage, current, or operate frequency is different from "CONTACT DATA" table, please arrange corresponding tests for confirmation.

3. Ambient temperature curve of the electrical endurance test

Ambient temp. curve (one cycle)

Temperature (°C) vs Time (h)
1) The minimum temperature is -40°C.
2) The maximum temperature is 125°C.

Disclaimer
This datasheet is for the customers' reference. All the specifications are subject to change without notice.
We could not evaluate all the performance and all the parameters for every possible application. Thus the user should be in a right position to choose the suitable product for their own application. If there is any query, please contact Hongfa for the technical service. However, it is the user's responsibility to determine which product should be used only.
